Prompt SMS once kids safely reach school premises or home
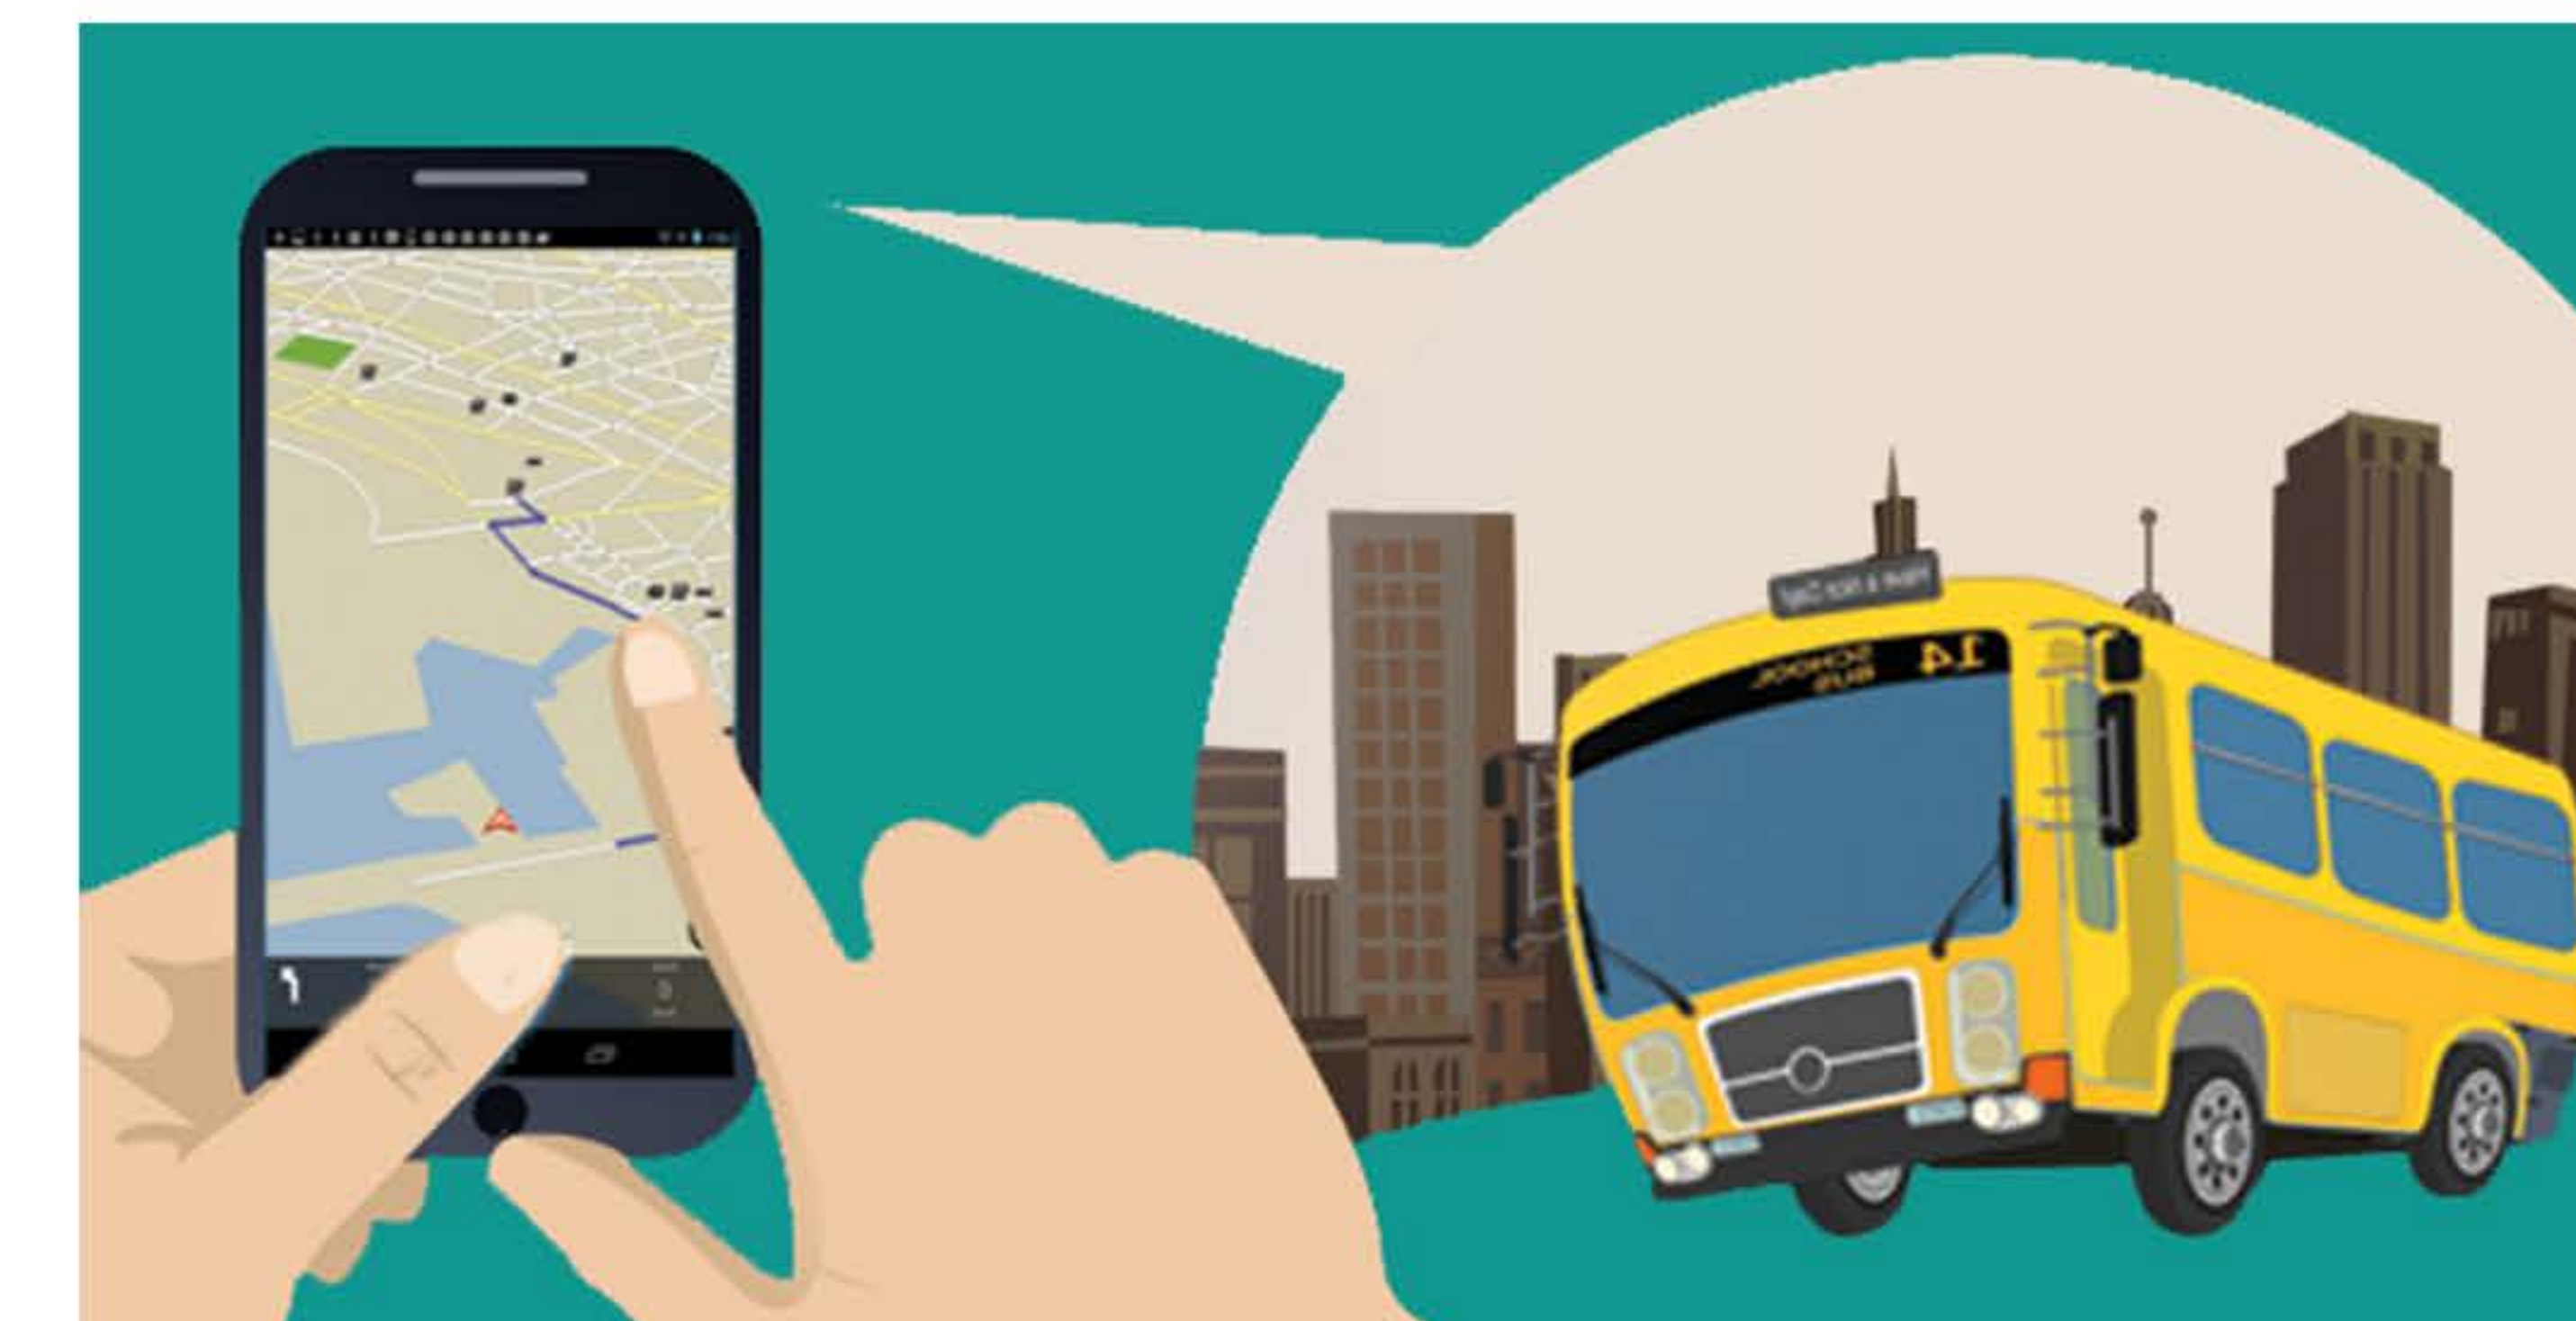

Parents are worried about their kids safety whenever they are not around.

Offer them peace of mind through an App!

Keep parents informed of their kids where-abouts, while they are on the school premises or riding the bus.

Keep them tension free with notifications to anticipate unexpected stops or traffic jam delays.

✦ RFID-enabled ID card
✦ Parents remain tension free: reassured by SMS once their kids safely reach school premises or home.
✦ Notifications in case of delays, traffic or routes diversion

Invest in your students safety Make your school a modern and secure place to study without worry

School Bus RFID and GPS Tracking Sysytem
Peace of Mind, Privacy & Saftey

✦ RFID technology
✦ GPS tracking system
✦ Student's attendance with RFID card
✦ Driver and Parent apps
✦ Invest in your students' safety!

Gain time and peace of mind!

Do you know where is your driver at this precise moment?

Are you sure Siva Kumar is on his way to your school?

School authorities often receive phone calls from anxious parents when a bus is delayed or if the routes are modified.

Rely on technology to gain time, provide information and ingenious tension free solutions.

The RFID & GPS Student Tracking System is a smart way to invest in your students safety while managing the drivers routes and parents worries easily.
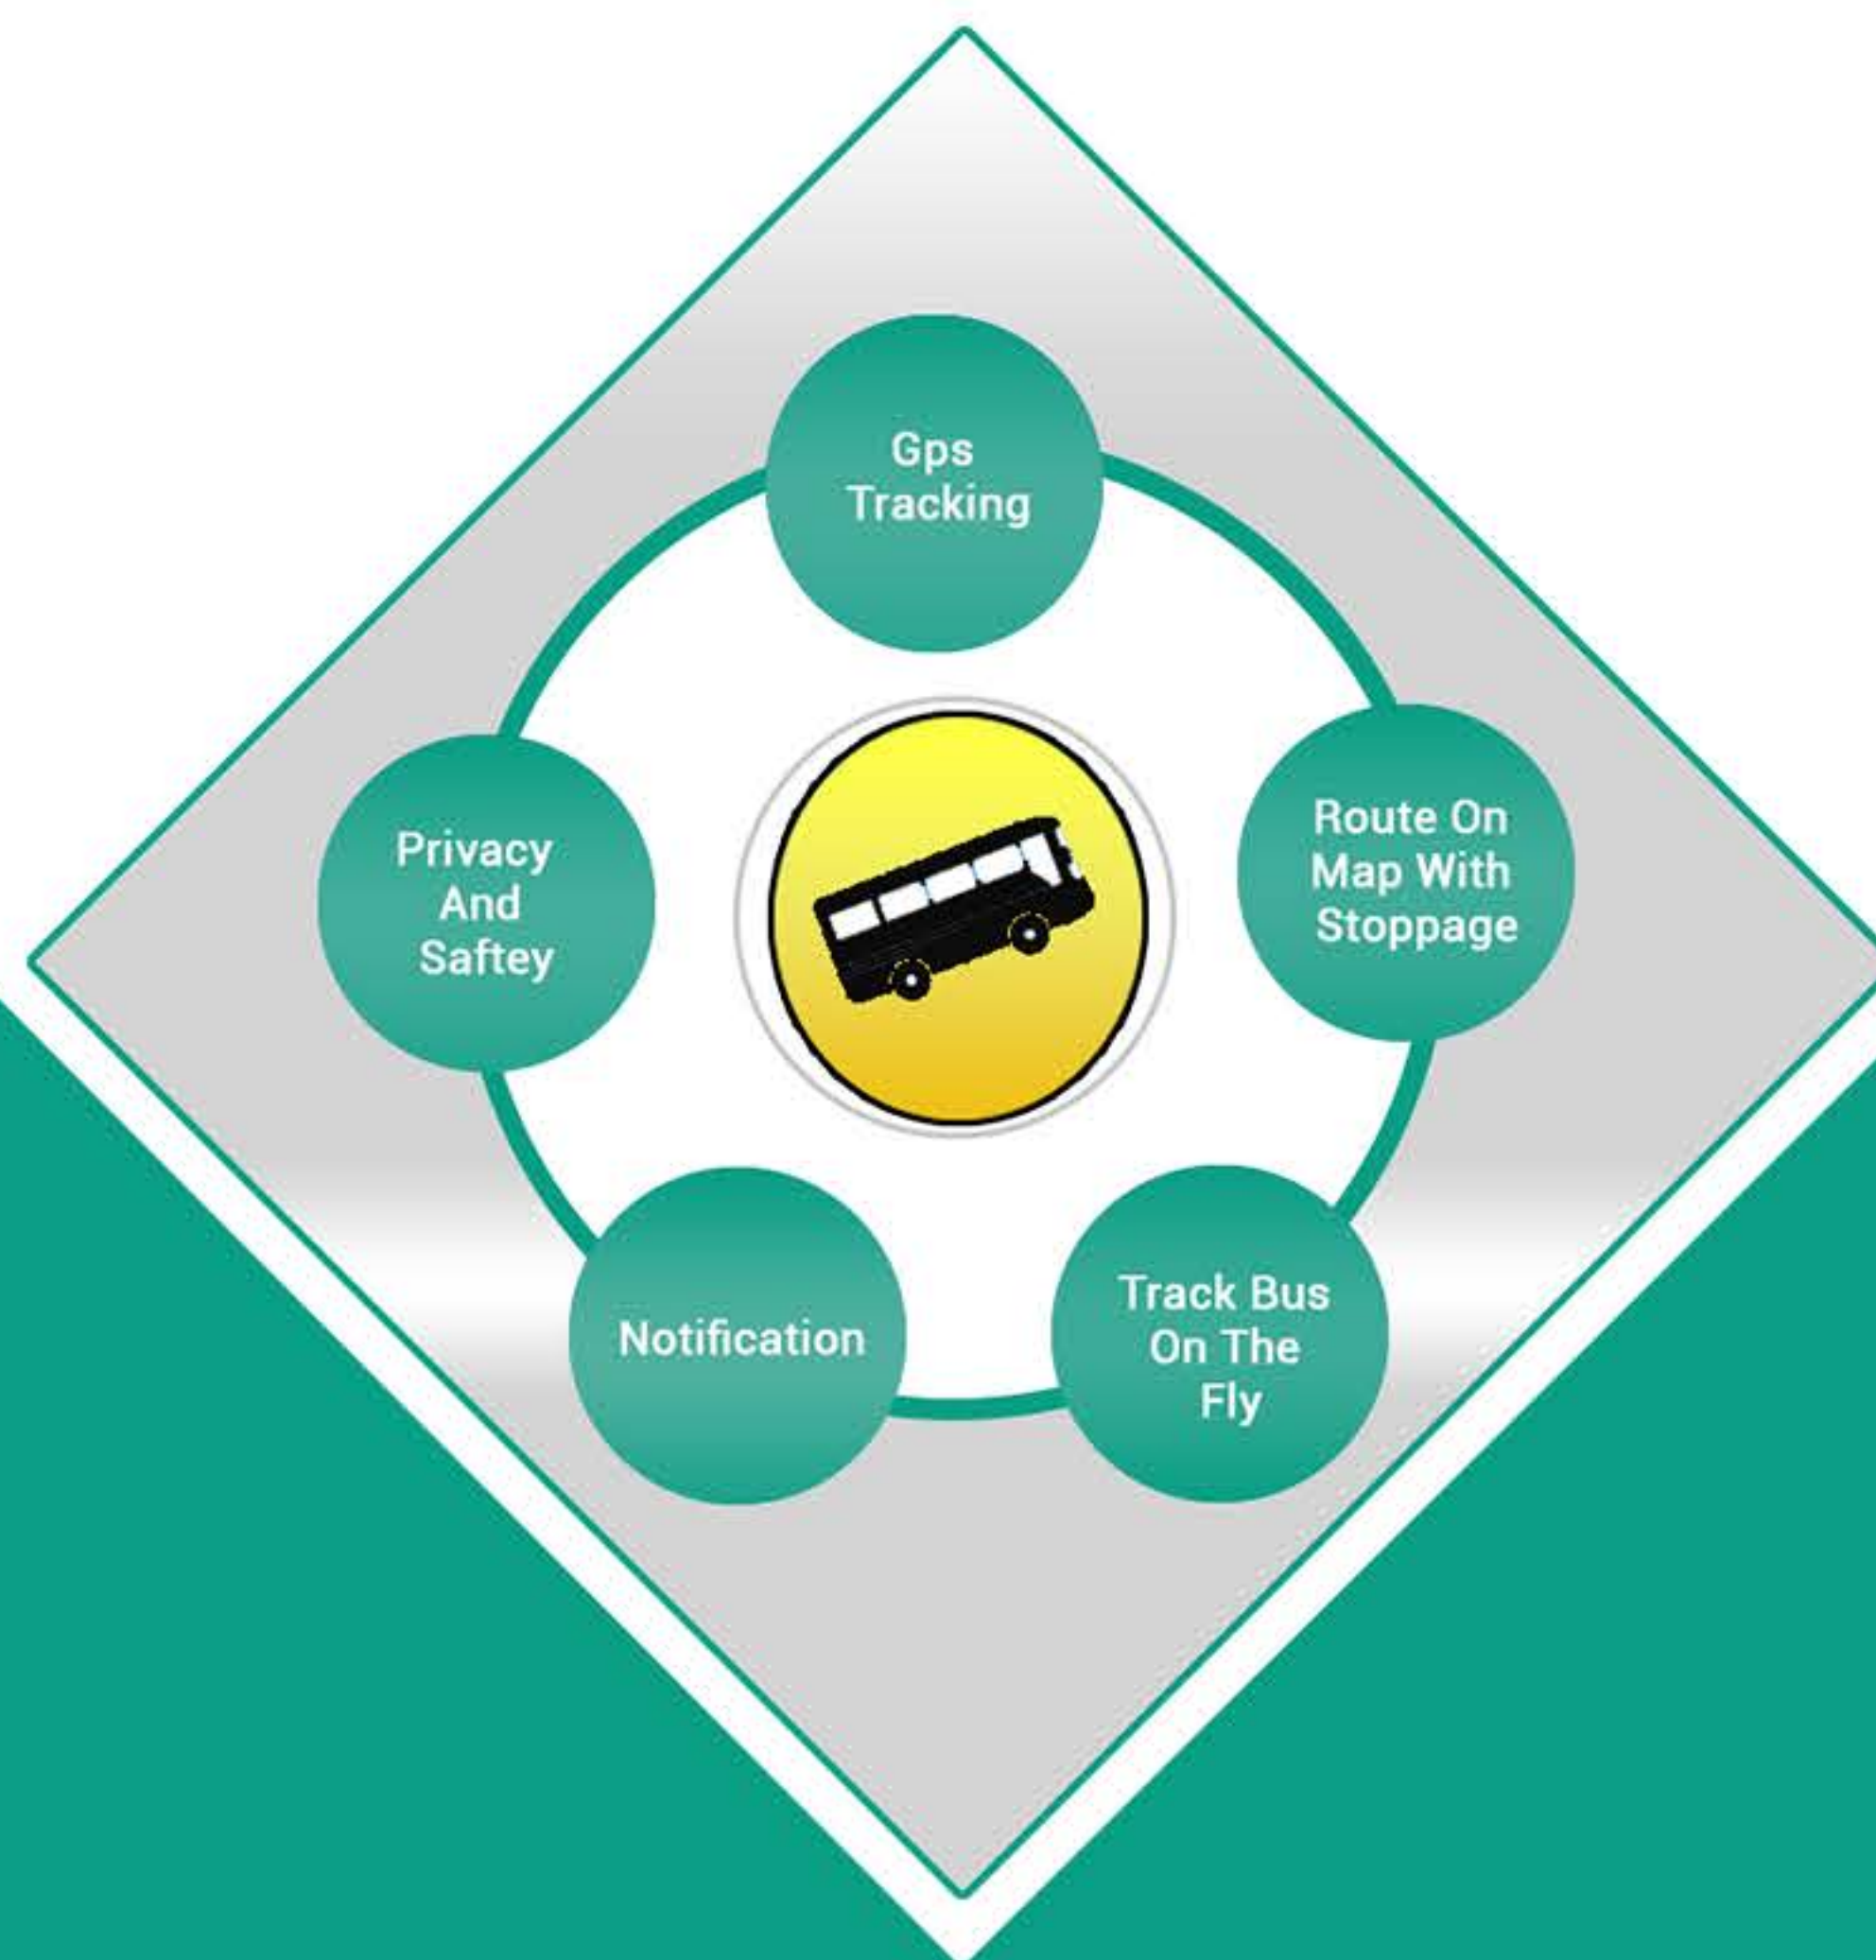

Now you will have an answer and a solution to provide at anytime.

Technology, reliability, peace of mind

RFID & GPS Student Tracking System is the modern solution for school authorities to keep being apprised, anytime and anywhere, of unexpected events during the students daily transit.

Through a radio frequency identifier, students and buses are tracked by a GPS solution.

Manage and anticipate any delay directly on your computer.Gain time through our device and our apps.

Driver app

Your usual driver is sick. You have hired a replacement and are worried about the boarding and disembarking points...

Technical support

Predefined routes and scheduled bus stops.

GPS support

In real time, the driver knows about the road conditions and can manage the diversions.

Notifications

Track drivers, anticipate delays and keep the parents relaxed with information about their kid's well-being through SMS.

Trust our app to assist your driver!

No more worries about a driver's itinerary or anxious calls from parents. Our tracking system will be there for you.
